PROFESSIONAL SUMMARY

AI and Computer Science graduate with a strong foundation in applied machine learning, computer vision, and educational technology. Passionate about teaching and integrating real-world AI into student-centered learning. Experienced in curriculum development, hands-on workshops, and academic research. Also trained in UI/UX design through NTI Creativa, gaining practical skills in user research, wireframing, prototyping, and Figma, combining technical knowledge with user-centered design to create intuitive digital experiences.

EDUCATION

Delta University For Science And Technology
Bachelor's Degree in Artificial Intelligence Faculty Of Artificial Intelligence
Final Grade: Very Good With Honors (GPA :3.419)
Graduation Project Grade: A (Excellent)

Mansoura, Egypt
Sept 2021 – June 2025

EXPERIENCE

Instructor – Scratch, Python & LEGO Robotics

Mansoura-Egypt
May 2025 – Dec 2025

- Design interactive lessons and hands-on activities tailored to different learning levels
- Teach children aged 6-14 fundamental programming concepts using Scratch, Python, and LEGO robotics kits.
- Design interactive lessons and hands-on activities tailored to different learning levels.
- Prepare students for local programming and robotics competitions through guided challenges.
- Introduce concepts like motion, loops, conditionals, sensors, and event-driven coding in creative ways.
- Deliver both in-person and online sessions, promoting active engagement and critical thinking

UI/UX Designer Intern — NTI Creativa

Mansoura-Egypt
Dec 2025- March 2026

National Telecommunications Institute · Innovation Hub

Completed a 120-hour internship focused on real-world digital interface design projects. During the internship, I learned and applied core UI/UX design principles, including user research, user personas, wireframing, and interactive prototyping using tools like Figma. I also practiced analyzing user needs, improving usability, and structuring clear user flows to create intuitive digital experiences. The program helped me understand the full design process, from identifying user problems to developing visually clean and functional interface solutions.

Technical Content Developer

Mansoura| Egypt
May 2025 – Dec 2025

- Developed ready-to-use lesson plans and digital content for classroom use.
- Designed structured curricula for AI, coding, and robotics tailored to children and teens.
- Created challenge-based activities to reinforce logical thinking and tech concepts.
- Worked within an educational team to align teaching materials with learning outcomes.
- Contributed to hybrid learning formats (online + in-person) to increase accessibility

PROJECTS

1- Sign Language Translation System (Graduation Project)

Sep 2024 – Jun2025

Full title: “An Intelligent System for Real-Time Arabic Sign Language Translation using Computer Vision and Deep Learning”

Skills Used: Python, TensorFlow, Keras, OpenCV, CNN, Bi-LSTM, Computer Vision, Deep Learning

- Developed a deep learning system to translate Arabic sign language into text and speech.
- Integrated a 3D avatar in Unity for real-time animated signing using WebSocket.
- Focused on accessibility for deaf and mute users through AI and 3D animation.

2- Pneumonia Detection Web App using Deep Learning

Feb 2023 – May 2023

Full title: “An Implementation of a Smart System based on Deep Learning for Pneumonia Infection Detection”

Skills Used: Python, Keras, CNN, VGG16, Transfer Learning, Image Processing, Flask, Web App Development

- Built a web app that detects pneumonia from chest X-ray images using a pre-trained CNN model.
- Achieved over 90% validation accuracy and published results in a university journal.

3- Mini Games using Unity

Unity, C#, 2D Game Design

- Developed several simple 2D games with scoring systems, animations, and basic player controls.
- Focused on educational and logic-based gameplay for kids.
- Independently handled game logic and UI flow.

4- Augmented Reality (AR) Prototype

Unity, AR Foundation, Mobile Devices

- Built a basic AR experience where virtual objects are rendered on real-world surfaces.
- Designed to overlay animated 3D elements when scanning an image or marker.

5- Download Manager GUI (Python)

Python, PyQt5, Qt Designer

- Designed a desktop GUI app that allows users to download files by entering a URL.
- Implemented file saving, progress tracking, and error handling.
- Connected frontend (Qt Designer) to Python backend using PyQt5.

6- Educational Tools & Interactive Teaching Content

Scratch, Python, LEGO Robotics, PowerPoint, Curriculum Design

- Created custom activities and missions for children learning coding and robotics.
- Developed interactive lessons and visual slides to simplify programming logic.
- Delivered workshops to help students learn loops, conditionals, and sensors in a fun way.

PUBLICATIONS

Co-authored:

“An Implementation of a Smart System based on Deep Learning for Pneumonia Infection Detection”

Published in :

“the Journal of the Faculty of Artificial Intelligence, Delta University, 2024.”

ACADEMIC RESEARCH PROJECTS

-Sign Language Assistant for Communication with Deaf and Dumb People Based on Computer Vision

(Graduation Project – Unpublished)

SOFT SKILLS

Communication, Teamwork, Problem Solving, Creativity, Time Management, Detail-Oriented

LANGUAGES

Arabic: Native

English: Good

TECHNICAL SKILLS

Languages | Python, C#, SQL, HTML/CSS

Frameworks | Flask, PyQt5

Libraries | TensorFlow, Keras, Pandas, NumPy, Matplotlib

Developer Tools | VS Code, PyCharm, Jupyter Notebook, Google Colab, Arduino IDE, Microsoft Office (Word, PowerPoint, Excel), Git, GitHub

UI/UX Design Tools | UI/UX Design Tools | Figma, Wireframing, Prototyping, UX Research, User Personas, User Flows, User Journey Mapping, Information Architecture, Usability Testing, Interaction Design, Design Systems, Visual Design, Responsive Design, Low-Fi Mockups, High-Fi Mockups, Canva

Game & AR Tools | Unity, AR Foundation

Game & AR Tools | Unity, AR Foundation

Educational Platforms | Scratch, LEGO SPIKE, Microsoft Office, Anaconda, Canva.
